Dear Church at Hill Park,

I have read the draft minutes and statement records of Brian, Abbey and Kevin contained in the minutes made about the 24th August 2021 and was rather shocked, but can understand the resulting action and reactions.

This is because as you will be aware I had been an active member of your congregation for some time and witnessed the many issues that you were concerned about, but being a none church member it was not my business to point out the error that I knew to be practiced and believed.

Due to these serious issues I could not, in conscience, seek membership with the Church even though Brian had assured me there was no reason why I should not be considered as a candidate for membership.

I have kept notes of the many issues that I identified, both doctrinal and practise, relating to those matters, during those times with you, and posted them to all concerned. That is Brian, Kevin John and the elders by means of a video reference.

I also wrote to you in October 2021 regarding some of these matters. Here is the letter that I wrote to you, via the Elders.

It is my view that the errors that you identified, of all involved, should be scripturally pointed out in doctrinal specific terms, and recorded for all to see, in order for those who have withdrawn can by the grace of God re-examine what has taken place, for their and your future good.

Please view the following YouTube references stating my concerns for reference.
