

Good evening welcome to the black conservative voice with David Colbert here on the CTM news network the voice of truth. We have a special guest today MISS OLA HAWATMA, we're going to begin a little bit about sharing a little bit about her and also the District that she will be representing after she's representing New York she will be representing New York's 19th congressional district in November 2020. She will be elected, i'm predicting, we hope and pray that she is because we do need a republican in that area.

After redistricting in 2012. The 19th district comprised of all, all of Colombia Delaware Green Ostego, I don't know i pronounced this, Schohera Sullivan Ulster counties and parts of Broome Dutchess and Montgomery and we're Nessler Counties these names.

The 19th district borders Vermont Massachusetts Connecticut to the East and Pennsylvania to the Southwest. Democrat president Barack Obama won the new district by 6.2 percent in 2012, while Republican Donald Trump won the district by 6.8, in 2016. And from 2003 to 2013 the. The 19th district was composed uh okay let's move on um along uh is running for as i said earlier for the The 19th congressional district in New York City she is endorsed by the National Rifle Association the New York State Conservative Party and the New York State Troopers PBA, the National Pro-Life Alliance, 2a Sanctuary and the Kingston Officers. Ola is a business owner, designer, philanthropist and conservative activist, as the daughter of Christian Immigrants from Jordan. She has a unique understanding of what it means to pursue the American Dream and she's running for Congress to ensure that the Freedoms and ideas that make our country great are preserved for the generations to come.

Ola has been recognized as a top local female business owner and most as the most influential woman she founded her first company in 2004.

Mom me makeover a company that specializes in makeovers to help others look good inside and out.

Now let us welcome Ola Hawatma.

Hi well i'm running this campaign as a write-in i'm running this campaign as a write-in and it's like no other campaign you probably ever seen i have

farmers small business owners. I have a lot of people in the district who have recognized they have a voice here's someone that believes in them okay you know we had primary night i won here comes absentee ballots there are 8 000 missing ballots i support the party and i told them i support them but when i'm hearing crickets come back to me that to me says that the district is being neglected people's questions are being answered people are not being addressed and i cannot turn around and say okay i'm not here to help no i'm gonna do everything i can right now we have an army out there because there's a war on our hands and we cannot give up and i will not give up um and so i'm praying that we do win i have a lot of supporters from county to county and we are out there knocking on doors putting up signs um doing things that not just like a typical campaign this is straight from grassroots it's straight from the people this isn't a campaign Ola for congress this is Ola for freedom this is ola for the people it's me and the people okay uh very good um could you tell us a little bit more about older the person and and in your your life as you did i think you had a video where you kind of reviewed who Ola Hawatma is could you like yeah so well the most important title that i have is a mother. I'm a mother of three boys two in college and a 15 year old um and a philanthropist i think everything that i do from starting mommy makeover to my first charity makeover for a cause to becoming a fashion designer and deciding to run for congress all of that one thing in common creating a purpose making a difference in people's lives creating influence influencing them with with uh letting them see the confidence that they have letting them see the light that shines within them because you never know stopping one person and giving them letting them see the confidence they have the difference that they can make okay all right very good i'm gonna start asking you a few questions here on the different issues that are addressing the area there in district 19. First of all um what would you do to enhance those uh or to improve on those programs uh as far as small businesses and stuff go in the economic uh community there the business i know we had a lot of problems doing these rides and everything else but uh what is your plans for the community in regard to business and the economic uh condition there well small businesses are closing down and New York 19 is like a ghost it's a ghost town from county to county there are 11 counties in each county it breaks my heart because businesses are closing down the streets are empty why we're getting this money coming in i know delgado has stimulus checks for business owners and business infrastructure where is it going we need to bring jobs into the district um i know that i've spoken to manufacturing companies outside the country but everything made in usa

let's use that let's bring manufacturing companies in upstate New York i would love upstate New York to be the hub for manufacturing companies i don't see why you can't um so we need to create more jobs for the people we can't just have money coming in and stimulus checks and and grants for what there are no jobs we need jobs the people need jobs we need job placement programs i volunteered for a couple of charities in New York 19 and when i told them i want to create a job placement programs they said no we can't do that you can't change our system there's an issue there there needs to be job placement programs we need to hold people accountable which people rely on government check month to month yeah they need to be held accountable because that is um we're going to take a short break right now we'll be right back with you in a moment we have a little technical difficulties but we'll be right back with with you in a moment here with um the black conservative voice and Miss Ola Watma to every single mother every small business owner every farmer every cancer survivor and every woman out there who has ever been put down by the establishment it's time to stand up on November 3rd we need you to write in Ola Hawatma on the ballot under New York 19th congressional make history in the New York 19th district with the first woman to win by a write-in don't just vote make history on November 3rd 2020 write in ola you'll never get anywhere if you don't take the first step i'm Ola Hawatma i'm a fashion designer and entrepreneur i'm the daughter of Christian immigrants from jordan and i'm a mom of three boys but i face challenges along the way i'm a survivor of domestic violence but that led me to create charity fashion shows helping women harmed by abuse i beat cancer twice and now run a fashion week to benefit cancer survivors and find a cure sometimes it's tempting to let yourself stop and become a victim but i turn those hard times into a runway to start something great today America faces tough problems and as an outsider with conservative values i'm stepping forward to fix them liberals want to stop our progress and send our country in the wrong direction but we're on a runway to make America great and we're not going back um we're going to take a short break right now we'll be right back with you in a moment we have a little technical difficulties but we'll be right back with with you in a moment here with um the black conservative voice and Miss Ola Hawatma so welcome back you're watching the black conservative voice here on the CTM news network the voice of truth and i'm your host David Colbert now we're going to move on to another question here for Miss Hawatma hallo um i'm going to ask in a minute a question but before i do that i want to um read a little something that i um had recently i did on my program on on Thursday

night um the catholic vote this catholic vote they call this as an organization catholic vote they launched a 2.7 million dollar campaign against Joe Biden in regards to his stance of course on life on the abortion issue and on education and religious liberties so i'm going to ask you right now what is your or your plans especially in the community there in regards to the abortion issues and and the abortion issues mainly and religious freedoms and things like that put a stop let's put religion aside okay it's murder it's a crime it's murder to me abortion is murder the fact that planned parenthood got tens of millions of dollars during covid 19 is appalling to me so what i plan on doing i'm a hundred percent pro-life shutting down every single abortion clinic and we can't do it with fighting i would love to and i was working on something where i was having fertility clinics team up with planned parenthood and having these kids teens who want to abort there has to be counseling you can't in New York they they put a stop to that i'm sorry if your child wants if your teen wants to abort a child that's their that's their choice pro-choice no that cannot happen there has to be counseling there has to be something else because i know five ten years down the road and i have friends of mine who were thinking of aborting and something there was intervention there where they changed their mind so i would love here's your the fertility clinics you pay tens of thousands of dollars hundreds of thousands parents pay to have a child okay here's planned parenthood where they have these these teenagers or these women who want to abort their child i would love to partner up if not destroy planned parenthood because it's appalling what they get away with and i'm against it i'm against pro-choice i'm a hundred percent pro-life and if you don't like it tough luck okay well thank you ola um now moving on uh i want to ask you another question here this is a question that's dear and dear to your Americans hearts and that is the issue of uh defending our second amendment rights we need to defend those rights because of course they have the right to bear to bear arms and to defend our homes and our businesses from violence and all these other things are even going on right now in our country so what what is your stance on defending the second amendment rights the second amendment binds all the other amendments we cannot get rid of the second amendment and because that's what they're trying to do the left yes but slowly by creating regulations just like Covid 19 Pelosi created regulations on the second amendment which had nothing to do with Covid 19. a i'd like to remove the safe act and remove regulations on the second amendment it is not put there to hurt us it's put there to protect us all right all right and i understand exactly what you're talking about um well you know the second amendment

rights of course our president is behind the NRA and and other organizations um the um law and order they're calling the law and order president uh we just have a lot of negativity in the country right now because of the uh false information being placed out there against even our president and our government um what do you think of uh this issue that came up recently this is something this is a little off subject but uh this thing about the nobel peace prize with president trump and him accomplishing so much with the mainstream media is ignoring it like nothing's happening what do you think about that issue that's going on in the uh media today it's a shame president trump can come up with a cure for cancer and they'd blow him up and say he created it he can do no right everything that he does is wrong in their eyes i praise the president and i love what he's doing especially recently he's accomplished so much i think he's one of the greatest presidents we've had him and Reagan my two favorite and no one seems to see that and media just highlights um negative things which they kind of expand on or they fake news fake news is out there 24 7 about our president how come that is so as an as a child of my parents came as immigrants i know for a fact i know people who have parents that come from another country if they were to put down their president their king their leader they would be in jail yes but they come here you let you look at ilham omar she comes here Somalia and she trashes our president with no consequences yes well on that note we're going to take a short break here you're watching the black conservative voice with David Colbert and we are interviewing uh future congresswoman uh ola hamada dr melinda morris supports a strong economy safe neighborhoods limited property taxes and promotes an improved education system Dr Belinda Morris wants to improve access and insurance coverage for medical care Dr Morris is pro-life and will support right-to-life legislation in Austin Dr Morris will remain true to her values when she is elected to office she is going to Austin to promote life prosperity and personal freedom for the constituents of senate district 13. [Music] if you elect me your taxes are going to be raised not cut what does that mean for you more taxes taken out of your paycheck higher gas prices at the pump and utility bills at home skyrocketing medical bills you'll compete with illegal immigrants to keep your job an economy in ruins president trump is bringing jobs back historic gains 10.6 million new jobs in four months president trump fixed our economy before he's doing it again i'm Donald J Trump and i approve this message to every single mother every small business owner every farmer every cancer survivor and every woman out there who has ever been put down by the establishment it's time to stand up on November 3rd we need

you to write an Ola Hawatma on the ballot under New York 19th congressional make history in the New York 19th district with the first woman to win by a write-in don't just vote make history on November 3rd 2020. write in Ola Hawatma uh welcome back you're watching a black conservative voice here on the CTM news network the voice of truth i'm your host David Colbert we're going to talk a little bit about uh education what do you suggest it needs to be changed in regard to our children's education in your district and what needs to happen in the 19th congressional district there in New York to uh improve on the educational opportunities there well we definitely need a better curriculum in the school schools need to open up a a better curriculum better teachers we have district 18 a-rated school district and our school district New York 19 is not good at all i mean i feel bad for my nieces and nephews who go to school um so we definitely need a better curriculum we need schools to open up i know a lot of parents and a lot of friends and neighbors they don't mind homeschooling they're taking off work they're living on unemployment life is grim no it's not life needs to open back up schools need to open up we need a better curriculum for for our kids we need counseling we need better counselors we need better teachers um because this is the future our children are the future of this country yeah all right amen to that well um i have a couple more questions here i want to run by you um it says here healthcare you this is some information i got from your website ten years ago we were told by the Democrats the Obamacare would fix our health system our health care system and yet here we are in 2020 with many of the same problems Democrats now argue that we need to go even further towards a government takeover and this is something that we just cannot afford so you want to tell us a little bit about your health care and also about um i know you had some uh experiences in your life where you share with yeah pre-existing conditions if you also want to share about that and let the people know where you came from and where your strengths are absolutely now Obamacare promised us he would save us money he had four plans and the gold the bronze none of them in fact what happened was we paid more than double on our premiums yes a lot of doctors they had to shut down their businesses because of Obamacare Obamacare hurt us it did not help us so now to get back on our feet i mean i have pre-existing health conditions i've had cancer twice what's the answer Medicare for all is not the answer that's the answer if you want this country to go bankrupt no Medicare for all everyone has to pay something we can't just give away health care but there has to be affordable health care the marketplace needs to be reopened as it

was before Mbamacare you need more choices custom-made uh choices for health care i mean so i'm i don't know why my father on his health plan he has free mammogram screening line he doesn't need it so the marketplace definitely needs to open up we need more choices we need affordable health care not free health care but affordable and that's where i stand with with health care this is someone with pre-existing health conditions yes i understand and as you i have some pre-existing health conditions myself um the issues are very important matter of fact they're very important to me here in my location which is in Texas usa and um it's really a big thing i mean even president trump he had uh attempted to come out with the with his plan his health plan his health plan is a lot better than the other health plan but still we need some better rates on our premiums they're very the deductibles are still very high and they're and it's really hard especially when uh a lot of us here in America are out of work or you saw businesses close down i had another business myself that i was operating and that business went out of business so as you can guess my income went down so um now i'm here and i started my program here so this is a whole nother uh another direction for me as far as my career and everything else now um this um issue that we're having right now with this um uh what do you call it um radical socialism movement Antifa and BLM these things that are just i mean i'm very passionate about this stuff but i don't know if you've heard or not but i'm sure you have about mayor De Blasio uh speaking of closing down parts of New York um seven days at a time furloughing its employees even starting with his own selfie says and the 494 or more people in his office so um you are right there in New York so what do you think about that and also you can uh give us a little information on what you see there in New York because i know y'all still have a lot of things going on there in your streets as well with the with the foolishness that's going on with BLM and Antifa so i'm going to let you let you speak go ahead and go and tell us about what you think because you're right there in the thick of it our mayor and our governor uh De Blasio and Cuomo they are i feel trying to bankrupt New York that is what they're trying to do defunding the police officers having criminals out in the street bail reform and especially recently now they want to close down now what they're doing everything that they're doing is to hurt New Yorkers and to hurt New York they are not doing anything to help our state i would love to see both of them replaced and gone um if god gave me the the power and and the strength i probably i would take them both on i mean or i'd request others to to replace them because there isn't one person that i talk to even if they defend they say we have a great mayor how is he so great look at

what he's doing the past after coven 19 and after all these protesting he's not doing anything in fact New York city in the streets it's scary it's scary to get out there and his solution is to shut down no that's not a solution that's just covering up the problem yes i know exactly dealing with it later when it's grow yeah yeah i know what you're saying now the the thing with uh New York to me it was scary before and now if you got the violence in the street it's even scarier to me but when i came there i got i came in on a bus one time from new jersey and back in the 70s and i got stuck there in the city i couldn't even get out i was walking the streets of manhattan for a good while because i went up to watch the ball drop over there so that was scary even back then i was like 30 years ago almost or 40 years ago maybe wow yeah well now now think about it we have no we have no officers i mean the nypd what do they get paid 48 000 a year and they're like the best trained officers and now they defund them yet everyone's you're you're allowed to destruct and spray paint you should see saint patrick's center and everything else and stores are being broken into thieves and it's okay to see our city go down the way it's going down it's not okay we need to stand up no it's not okay it's not okay in New York and it's not okay in oklahoma or anywhere else in the nation but the thing is i understand i i study what's going on in the country uh the politicians and all the thing the democrat party for the longest time is only concerned about their pocketbooks they could care less about the american people yeah they only want to they want they only want things they're going to benefit their party their pocketbooks you got one of the richest women in this country standing at the head of the house of representatives trying to keep the american people from getting just a little few stimulus dollars to help them to in their recovery this is pure what did she do i i totally yeah we know we saw you during phobia 19. i totally agree with you yeah she she has really pretty much done nothing uh they wasted a lot of time back at the end of last year which is impeachment stuff i was so tired i was so tired of reporting on that garbage because it was all false and they're still doing the same thing now what they need to do is get their behinds up and do it do their job i appreciate recently uh 25 democrats uh gathered together to join with the Republicans to create a bill a 1.5 trillion dollar bill that would help the people to get their stimulus funds and also help in other areas i'm going to go ahead and say this one thing and i'm going to allow you to close out um but the thing is is that i feel like this whole thing that Nancy Pelosi is trying to do and i know you agree with me she's just trying to give money to the cities who allow their cities to be destroyed and torn apart during these last few months she is trying to re-shore those cities up and if we don't give her

the money for that she's not going to give the money to the people what foolishness what about the people in the democratic cities what about the people in the democratic cities makes no sense whatsoever so i'm going to agree with you yes i'm going to ask you one more question and uh this is probably not a difficult question but i'm sure you probably thought of it but i'm going to ask you this one last question i have to ask it anyway what what have a helton sign what makes you believe that you're better for the 19th district than to say Mr Delgado what is it that you're going to bring to congress that will make a difference in this country in the coming years i'm going to bring something that doesn't exist in congress i'm going to bring compassion compassion does not exist in in congress my agenda isn't power is entitled my agenda is to serve the people as a god-fearing woman as a Christian as a conservative that is my duty i feel you know god put me on this earth and i'm just um i'm doing his work um so that is what i would do differently it's not about power it's not about money you look at as you said Pelosi and everything there's so it's greed and selfishness and all they care about is the vote and once they have that vote all they care about is getting re-elected yes well um i want to thank you Ola for joining us here today um i want to say to the people of New York get out and vote in November and vote now Ola Hawatma she will stand up for the people she will stand up for our god and she will continue to represent you there in the district she's represented in different areas she's helped the women there establish themselves and she i'm sure she's going to be doing great things in the future so vote for her yes the right and ola so right h-a-w-a-t-m-e-h you will see my signs everywhere and you will see the people people in the district this is a campaign for the people it's not for me it's not for you it's for the people and and their future yes we're very good and also if you want to tell them where the webs where your website is you could go they can go look at look on there also as well ola for congress Ola for congress.com very good once again i want to thank you for joining me here Ola Hawatma it's been a pleasure meeting with you and you have a great rest of the evening god bless you as well god bless you to every single mother every small business owner every farmer every cancer survivor and every woman out there who has ever been put down by the establishment it's time to stand up on November 3rd we need you to write in Ola Hawatma on the ballot under New York 19th congressional make history in the New York 19th district with the first woman to win by a write-in don't just vote make history on november 3rd 2020. write in Ola Hawatma good evening welcome back to the black conservative voice with David Colbert here on theCTM news network i

want to thank miss Ola Hawatma for joining us here and spending some time with us uh tell us a little bit about um New York uh congressional district 19 her race there uh i will make this statement she um has expressed to me she is a writing candidate so if you're in that area uh you'll see her size of everywhere write her in as a candidate for district 19. she really has good ideas and good good things with that district um and uh we'll go into that story later on now how um uh things didn't go quite right in the way that they were um regulating the voting there uh something dealing with absentee voting of course we know that's one of the issues they'll be trying to use in November also to cause problems in the race for president and for the remainder of the congress okay De Blasio says New York could see more layoffs without financial assistance from Washington why do you want financial assistance for Washington when he wanted to help you to stop the um violence and all these things are going on you will call it a peaceful protest now you're saying that you need president trump and his administration to give you financial assistance why New York city mayor Bill De Blasio announced Wednesday that the city will be forced to lay off some city employees if it did not receive financial assistance and federal government said uh setting off a fire storm criticism yes of course New York if the federal government does not come to rescue with financial assistance New York city mayor Bill De Blasio says that the city may be forced to lay out city employees like police officers fire firefighters and health care workers now see this is the thing that i told y'all about earlier that was their objective anyway they were trying to destroy the city they were trying to bring the city down they knew that these the situation that they were preventing from being curtailed like the violence in the street and destruction of property and businesses there was going to cause a problem in New York yet now they have their speaker of the house Nancy Pelosi trying to push for extra money or trillion dollars to New York and a trillion dollars to California that's really what it's all about people now they want us to bail them out this is the taxpayer money we're talking about they want us to bail them out for their mismanagement of their cities in their states they found 58 billion dollars he says effortlessly for the airline industry why are they not helping American cities and states get back on their feet De Blasio said yeah why are they not helping a democrat run cities in a democrat-run state it's because the democrat would not allow them to come in and cause these issues to stop in their cities and in their states in different cities in the states they kept letting it go on and on and on at least Wisconsin has some sense of calling the president to bring in the national guard Portland is still objecting to those

those terms so don't ask us for anything in the republican party if you don't want to manage your cities yourself the mayor's announcement ignited a firestorm of criticism from various unions in the city of course representing various groups of city employees he's talking about getting rid of first responders first responders are not political pawns the firefighters are not political pawns we are the people who protect this city said Gerald Fitzgerald of the uniform fire firefighters association our entire social fabric is under tremendous strain and police officers already stretched thin trying to maintain order said the PBA president Patrick Lynch if we cut cops there will be chaos instead of recovery critiques of De Blasio said that he cannot get the city the money it so desperately needs by threatening to lay off the first responders but by having constructive talks with the president in congress the mayor also cautioned that the city is a long way from being able to end restrictions intended to contain the coronal virus um whatever it is that they're doing because they're shutting cities down while cities all over the nation open up but in a democrat-controlled cities the states are still trying to keep everything locked down and he said the rest of the country should not be reopened too quickly either thank god things are getting better in New York city but we still have the long way to go you got a long way to go but it has nothing to do with the pandemic that went on it has more to do with your former government and how you're running our country through the states well we're going to take a quick break right now we will be right back with you in a moment here on a black conservative voice with David Colbert Dr Melinda Morris supports a strong economy safe neighborhoods limited property taxes and promotes an improved education system Dr Melinda Morris wants to improve access and insurance coverage for medical care Dr Morris is pro-life and will support right-to-life legislation in Austin Dr Morris will remain true to her values when she is elected to office she is going to Austin to promote life prosperity and personal freedom for the constituents of senate district 13. [Music] welcome back you're watching the black conservative voice with David Colbert here on the CTM news network the voice of truth republican Mccarthy or representative Mccarthy said this what is Pelosi what is what has Pelosi done democrat majority solved what have they done what have they solved in the house they saw nothing they should be embarrassed of how much they have embraced the socialist this was a report by Fox News the republican party has retaken the house of representatives is not a far-off fantasy representative Kevin Mccarthy or republic of California told the lord Ingham hosts our lord um the Ingram angel host Laura Ingram under house speaker Nancy Pelosi not many

problems have been solved Mccarthy argued and democratic representation is dwindling you know there was something else that went on and we skipped over there a lot of times we go over news and we don't repeat things things that we need to be focused on you know they're always talking about all these things about recovery they turn down a bill that representative scott put up with some other people trying to uh put out a bill to help to govern uh how the police uh unit and everything operates the police departments yet they rejected that bill in the house they're not they don't want any solutions other than the fact if you give me trillions of dollars and we'll try to do something to keep money in our pocket pretty much that's it because they don't care about the American people they rather keep you broke and rather destroy your life and he goes to say do you know that there are fewer democrats in the house says Nancy Pelosi held the gamble he asked we won every special election we played in and that was in democrats seats that democrats won by more than nine points and it happened to be in california yeah it was california this is uh nash pelosi all these democrats and they're hurting our country the real question is what are the results of the democrats he continued they should be embarrassed of how much they have embraced socialists name me one problem this democrat majority has solved there isn't one the only one that came close to solving is when they gave the american stimulus when they agreed with the republican party but ever since then all it's been is partisan legislation put up by Nancy Pelosi not even her own cons our own people and not definitely not her constituents she's not even listening to them and what they need they got a bunch of people on the street uh defecating on the streets doing things that is disgusting on the streets of san francisco yesterday we watched the world peace happen for the middle eastern steps inside the white house he said you know what Nancy Pelosi did she turned down the invitation and she held votes in the floor of the house trying to make members not go there what kind of foolishness is this if you know you look at old CNN and they're sorry so they didn't even put it up the only thing they put up there on the screen when they were doing the uh the uh the peace signing agreements uh peace agreement signing they put them there the people were not social decency give me a freaking break did were the people the writers that were the right to social discipline were they they had mascot but a lot of times they didn't have anything on did you say anything about that of course we all know it's a big fat no you didn't say anything according to political report mccarthy is being pressed to oust pelosi from her seat but the but uh he told ingram uh that he doesn't think it's the best tactic prior to the election i think the best move is to win 218

seats and that defeats Nancy Pelosi he said but you know what else defeats jerry nadler maxine water adam schiff and the others that is our best play right now in other words people we need to get these do nothing democrats out of office now if you want to advertise your business or your your um campaign we have advertising spots here during this program here on the ctm news network the black uh black conservative voice you can advertise here and uh our rates are very very low and you can get in here and before the election especially you can get quite a few spots we have several politicians that are coming on and they're getting quite a few spots and it's going to put them out there we are seeing at least 37 states of course the union so we're going to take a quick break right now and we'll be right back at you in a moment here on the ctm news network the black conservative voice commander in chief it's more than just a job since taking office president donald trump has rebuilt our military repaired a broken va and eliminated soleimani al-baghdadi isis the world's deadliest terrorists brought to justice today america is safer and stronger than ever because to president trump it's more than just a job it's a sworn duty to keep america safe i'm donald j trump and i approve this message welcome back you're watching a black conservative voice here on the ctm news network the voice of truth i'm your host David Colbert fbi director ray says antifa is real fbi has cases against people identifying with the movement it is not fiction race says of course we know that jerry natalis says who is that do they exist yeah he's asleep and so is nasa pelosi all she thinks about is herself and all the millions she have people don't vote for Nancy Pelosi don't vote for entities do nothing democrats all they're doing is lying in their pockets that woman is extremely wealthy yes she is denying the american people a small stimulus twelve hundred dollars per person she's concerned about rebuilding cities that there do nothing democrats allowed to be destroyed by antifa and blm and they've been in the news quite a bit and i'm sure they like that that they're in the news even if they go down we'll see their ugly heads in the next coming election in four years as well because it is a marxist organization they've admittedly said it and there are local terrorists there are there are homegrown terrorists here and we need to treat them as such and i'm with the president he says when he gets back into office he's going to declare it insurrection and he's going to clean up the streets so if you want your streets cleaned up in your city re-elect president trump he will make an order for insurrection and just go in and take it all out and get it all done maybe in one day in a week and i guarantee once he hits the first city they will all be getting out of there because they are getting serious times for these behaviors fbi

director chris wray made clear that antifa is not a made-up right-wing conspiracy theory and that the fbi has cases involving those connected to it appearing at a house homeland security committee hearing thursday ray explained that while antifa is not an organization in traditional sense it is a movement and there have been suspects who have claimed to be part of it and keep was a real um real thing is really any fascism it's not a group or an organization it is a movement or an ideology maybe one of the ways of thinking of it ray said and we have quite a number and i've said this quite consistently since my first time appearing before this committee we haven't any number of property predicated investigations into what we would describe as a violent and anarchist extremist and some of those individuals self-identify with antifa ray's words were in a response to representative debbie lesko republican from arizona who claimed prominent democrats have called antifa a fantasy in july representative jerry nadler we all heard that one democrat from New York had dismissed the idea of tnt for violence in portland as a myth that's being spread on the washington dc give me a break jerry nelly you're a myth you're a myth i i i ask asked y'all to look at his early tapes how he was he's gone way off on the left somewhere later in the hearing representative donald payne democrat from new jersey asked the clarification about the nature of antifa and ray explained further antifa is a real thing it is not a fiction uh reiterated but it is it is not an organization or structure he again described it as more of a movement but again noted that there have been those who self-identify as being a part of that group they say i am antifa ray stated republicans on the house judiciary committee on tuesday sent to send a letter to nadler the committee chair criticizing him for launching fruitless put partisan fruitless partisan investigations into president trump while ignoring the threat of antifa yes uh you you're the democrat sister we're doing things people oh no the american people don't need any help they're okay through the corona buyers yeah the cities are destroying their businesses they're burning them down but they're peaceful protesters they're not trying to hurt anybody this is expressing that their insurrectionism and they need to be punished to the full extent of the law if i was if i was the president's country president trump is a very very nice man because i would have sent the military in regardless of what they said they tried him under a false impeachment hey what the heck if he's asked the center man they're still going to complain they're still going to say that he did something that was wrong so if you don't if you do and you don't if you don't i want you the other word the letter called on nana to denounce the left-wing violent extremist and convene a hearing to investigate the unrest engulfing a

number of cities across the country while nadler and his other democratic cronies have remained relatively quiet on antifa the party's presidential nominee joe biden has condemned the movement give me a break he hasn't really said anything about antifa if you go on the internet look what type in antifa.com and under uh uh antiva.com and it goes directly to joe biden fundraiser what is that you go to blm and try to make a donation it goes to ag blue which is part of democratic party what amazes me is they're not changing these things they're not trying to cover it up if you go check right now you'll see it's still there i don't know if those organizations prevented now blm i checked with them they've changed their general website but if you want to donate you still gotta donate to act blue so you're not you don't know about the unwrestled city uh cities on democrat party you don't know nothing about antifa uh uh joe biden who has not mentioned the word antifa in his rejection of violence at all he hasn't said it show me a tape where he said antifa he has it he just says i'm against all violence give me a freaking break speaking to local news station in pennsylvania last week bonnie said he's against all violence that guy said i've condemned it across the board he says bond told participated wgal news 8 in an interview monday referring to violence during the protest let me tell you something one of the reasons i supported ronald reagan when he was uh voted and also president donald trump when he was elected i didn't really vote for him even in 2016. at the time i was in the middle of moving so i uh my my districts changed i was unable to vote by the time the elections happened but if i had seen this platform but he stood on i would have voted for him even back then but let me tell you what i like about our president he's got guts who wants a win for president like jimmy carter was who wants to win for president i want somebody with some guts somebody to stand up protect this country you've got to have a big man a man that's strong enough to have it have a will and to stand by his his his uh his his police policies if you have a weakling in the white house as pretty much i think president obama was a weekly he was a very weak president he is he's like he didn't care and i think a lot of it dealt with the fact that he was part of the socialist movement as well so he he hated capitalism he is one who taught constitutional law and he didn't believe it at all he stood there and put his hand on the bible and swore allegiance to the constitution of the united states of america then tried his best to tear it down the whole time he was in office for all those eight years i'm telling you people you better vote republican in november so we're gonna have a big mess in this country and even if we do do it we better hope for president trump to sign the military troops go into the city and clear up the insurrection because

that is really what's gonna happen people a revolution is coming and tifa has already promised that they're going to go out they're already doing it in some cities we need a president that has guts that's going to stand up against this communist movement communist yes you heard me say it right communist movement antivirus communist so is blm i'm not talking about the peaceful protesters there are people in that organization who claim that they love black lives no they don't there's so many black children that have been killed and these these riots and black people have killed these wives you hear anything about them or yet about george floyd uh felons people who committed serious crimes felonies even the same with jacob blake rapist sexual assault and they praising him like he's some great uh king or something like that you know we need to stop this foolishness in america we need to stop glorifying criminals you know the description of bibles that said that there will be people in the end times would look at people and say oh this is okay and just let it pass well let me tell you something democrat party the lord spoke of you in revelation and let me tell you this fact he also said you will not get away from it you will not get away with it he is watching more so than any other politician or any other party god is watching he knows what's going on and your day is going to come there's a scripture that also says that the lord last is the wicked because he knows that their day is coming well i thank you for joining me here on a black conservative voice my name is David Colbert and i hope you come back and join with me on monday as we have our next next episode of the black conservative voice with David Colbert see you then and from ctm news i want to say god bless you god bless america and god bless the world and good night you Chat Replay is disabled for this Premiere.
